NeoDen

With a global presence in over 130 countries, NeoDen PNP machines offer excellent performance, high accuracy & reliability, making them ideal for R&D prototyping and small to high batch production. We provide a one-stop solution for SMT assembly equipments serving 10,000+ customers worldwide. Our pick & place machines support industries like automotive, power, security, IoT and communications, spanning worldwide. We also offer comprehensive after-sales support & training, ensuring our clients get the most out of their investment.

ChipMax Group
The Technology Cluster

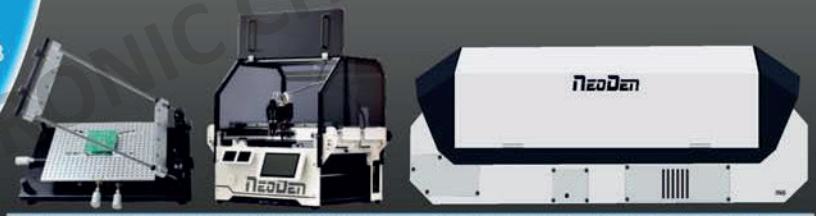

As the exclusive NeoDenTech partner in India, Chipmax Designs delivers top-tier SMT solutions from our Bangalore headquarters and regional offices in New Delhi, Mumbai and Ahmedabad. We are specialised in the supply, customization, installation, and support of Neoden SMT Pick & Place Machines in sectors such as EMS facilities , OEM manufactures of Electric vehicles, IOT , Automotive , R&D, Solar and other Power solution products Etc. Our commitment aligns with the Atmanirbhar Bharat and Make in India initiatives.

IPA Doesn't Remove All Flux Residues
Completely remove flux. Improve reliability

FR104 PCB FLUX CLEANER

INDUSTRY STANDARD | NON-HIGHLY INFLAMMABLE

- For SMT, THT & mixed technology assemblies
- Removes baked-on flux
- Effec ve for rosin, water-soluble and no clean flux
- Leaves no residue and no dull, s cky patches
- Produces bright, shiny solder joints for reliable electronics
- Reusable and economical
- Retain prints and colour marks on components
- Can be used in Ultrasonic cleaner, PCB cleaning machines or used for hand cleaning
- Excellent compa bility with components
- RoHS compliant

COSMO TECH

CosmoTech India had a humble beginning in the year of 2002 as a Lighting company manufacturing Ballasts for Gas filled Tube Lights. In the year 2006, we migrated our production to CFL Lighting for Street Lights & Indoor Products. Knowing the importance of Led and its benefit in the year of 2009, we started our unit in Mumbai for led casting and made our presence Pan India. With more than 200 dIfferent Led casting Housings being offered to above 1400 manufacturers in India, Cosmo was providing solutions to the India

Led Lighting manufacturers an alternate to the dependence on imported Led Housings. Our team had the privilege to introduced Cosmo Brand in the market by 2013 and now have a very good acceptance for the brand name COSMO TECH throughout all regions of India.

Our Products : Flood Lights | Street Lights | Panel Lights | Bollard Lights | Highbay Lights | Gate Lights

Drishti Electronics has been serving the Indian electronics manufacturing industry for the past 10 years. We have established ourselves as a leading supplier in the electronics sector, renowned for providing high-quality PCB assembly consumables, tools, and equipment at reasonable prices.

Over the past decade, Drishti Electronics has built a reputation for excellence, driven by a team of experienced engineers. Our success can be attributed to our technically proficient team, prompt delivery, exceptional customer support, and consistent stock availability throughout the year.

Product Range Our extensive product range caters to most PCB assembly processes, offering tools, consumables, machines, equipment, and other essential requirements.

LORD KRISHNA PAD PRINTING MACHINES

LKPP are one of the uppermost Manufacturer, Wholesaler and Exporter of high quality Pad Printing Machine, Cliche Plate, Printing Pad, Printing Solvent, Printing Ink, Printing Machine Roller and many more. To manufacture the best quality products, we are equipped with the latest technology machinery at our manufacture unit.

We procure the quality assured components and ingredients for the same. We too have a team of quality controllers to perform various quality checks. Also, we have appointed the well qualified professionals to handle various units efficiently.

Understanding the changing requirements of our customers, we make use of the updated technology to help them with the most appropriate products. Implementing the latest technology for manufacture, our products are known for their resistance to heat & abrasion as well as high quality printing experiences. By using the quality assured basic materials, our products are known for longer functional life as well. Moreover, owing to the large manufacture capacity, we are able to meet the bulk orders.

ELECTRONIC CITY - September 2026

We believe innovation is the key to build a better future for our people.

DTOWN ROBOTICS is a leading technology company specializing in the design, development, and manufacturing of drones, robotics, and Unmanned Ground Vehicles (UGVs). With a strong focus on research and development, DTR is dedicated to creating futuristic products and custom solutions to address the evolving needs of various industries, including the government and defense sectors.

Automating Repetitive Task

Advanced robotics and automation systems are transforming manufacturing by making processes faster, safer, and more cost-effective. Robotic integration is not just the future but often the present of modern manufacturing. Our customers are already leveraging robotic systems to address various operational needs, such as picking, packaging, palletizing, and automated loading and unloading, among other tasks. By implementing robotic solutions, businesses can deliver faster and more consistent services, while allowing employees to focus on more complex and creative tasks.

Benefits of Robotic Automation

Robotic automation systems, like other advanced technologies, offer numerous distinct advantages. They boost productivity, reduce production costs, provide flexibility beyond what traditional systems can offer, and streamline packaging processes.

Some of the key benefits of robotic integration include:

- **Flexibility:** Advanced robotic systems and software can handle a wide range of materials and requirements with minimal downtime and without the need for frequent reprogramming.
- **Accuracy and Consistency:** Robots execute tasks with precision, following instructions step-by-step without deviation. Smart systems can adapt to variables and self-correct when needed, operating without fatigue, distraction, or human error.
- **Scalability:** Robotic systems can run continuously and at varying speeds to meet demand. They can also be modified to integrate additional equipment into a central control system, enhancing overall output.
- **Increased Throughput:** Transitioning to automated robotic systems makes production schedules more predictable and streamlined. This consistency allows businesses to meet quotas and fulfill orders on time, optimizing the entire supply chain.
- **Reduced Labor Costs:** Robots reduce the need for repetitive manual labor, lowering staffing costs and enabling technicians to focus on higher-value tasks. Robotic integration allows companies to achieve more with fewer personnel.
- **Improved Safety:** With robotic processes and machinery, employees face less exposure to hazardous equipment. Enhanced ergonomics protect workers, reducing liability and healthcare-related expenses for businesses.
- **Minimized Product Damage:** Robotic systems are equipped with sensors and programmed for precise movements, ensuring careful handling of products. This meticulous approach to picking, placing, and packaging helps keep items intact throughout each stage of the operation.

By integrating robotics into manufacturing, businesses can achieve greater efficiency, safety, and consistency, positioning themselves at the forefront of industry innovation.

Get in Touch with the Automation Experts at DTown Robotics Today

Robotic systems are designed to be fast, precise, and reliable. They can streamline your facility's operations, minimize human error, and help businesses effectively manage costs. At DTown Robotics, we specialize in developing custom automation solutions tailored to the unique needs of various industries. Being brand-agnostic, we collaborate with multiple leading manufacturers to deliver the best solutions that align with your specific application requirements. Contact us today to discover how we can help transform your operations with cutting-edge robotic technology.

ELECTRONIC CITY - September 2026

electronica India and productronica India 2026 – Bengaluru
16–18 September 2026 | BIEC, Bengaluru

Q1. India's electronics sector is expanding rapidly. Where do you see electronica India and productronica India fitting into this growth story?

India has already demonstrated that it can build electronics manufacturing at scale. The next challenge is to build greater depth across the value chain.

That means strengthening capability in components, semiconductors, design, PCBs, electronics manufacturing services, automation, inspection, testing and the supporting supply chain. If any one of these areas remains weak, it eventually shows up in cost, quality, reliability or speed to market.

That is where electronica India and productronica India play a relevant role.

The Bengaluru edition is bringing together 770+ exhibitors from 30+ countries, covering both electronic technologies and electronics production. Importantly, within this ecosystem, electronica India features a focused set of embedded design exhibitors, reflecting the growing importance of design-led innovation in India's electronics value chain, alongside broader electronic technologies and manufacturing solutions.

For companies, the value is in being able to compare technologies, assess suppliers, understand where manufacturing capability is moving and make more informed choices about what they source, what they localise and where they invest next.

At this stage of India's electronics journey, those decisions matter as much as capacity addition itself.

Q2. What has fundamentally changed in the electronics industry that makes a platform like this more relevant now?

The complexity of decision-making has increased significantly.

Earlier, a company could often evaluate a component, machine or supplier largely on specifications, price and delivery. Today, one decision can affect several others.

A component choice can influence product architecture and future availability. A production system affects yield, throughput and flexibility. Testing affects reliability and compliance. Automation must make commercial sense, but it also influences how consistently a company can scale.

Then there are questions around localisation, supply-chain resilience, shorter technology cycles and future product generations.

As a result, procurement can no longer work independently of engineering, and engineering cannot be disconnected from manufacturing.

That is one reason **electronica India and productronica India** are increasingly relevant. They bring these functions and conversations closer together.

The companies that build a competitive advantage will be those that understand the complete manufacturing equation rather than optimise one part of it in isolation.

Q3. Why is it important to bring electronica India and productronica India together rather than view them as two separate exhibitions?

Because the Indian electronics opportunity is increasingly difficult to separate into a components conversation and a manufacturing conversation. India is working simultaneously on deeper component localisation, stronger design capability and greater domestic manufacturing capacity. OEMs, EMS companies and manufacturers therefore need to make decisions across that entire chain.

electronica India addresses what goes into an electronic product: components, semiconductors, sensors, embedded technologies and electronic systems. Within this, a key highlight is the presence of embedded design exhibitors, reflecting the increasing role of design capability in shaping next-generation electronics.

productronica India looks at how that product is manufactured: PCB production, assembly, SMT, automation, inspection, testing and other production technologies.

For **OEMs and EMS** companies, these decisions are closely linked. A change in component or product design can directly affect assembly, testing, automation and quality requirements.

Bringing **electronica India and productronica India** together therefore gives the industry a more complete view of the electronics value chain, from design and sourcing to manufacturing at scale.

Q4. With 770+ exhibitors from 30+ countries expected at the exhibition, what should senior decision-makers actually be looking for?

I would encourage them to arrive with business questions rather than a shopping list.

Most senior teams already know their existing vendors and technologies. The greater value of a trade fair is often in challenging what you currently assume to be the best option.

For example: Is there a process in your plant that can be simplified? Is there a critical component where you need a second source? Is your current level of automation still economically right for the volumes you are planning? Are there technologies that could materially improve consistency, inspection or throughput? Are there suppliers worth qualifying now rather than waiting until the requirement becomes urgent?

Senior leaders should also look beyond the immediate investment cycle.

Some technologies may not be relevant to the business this year but could become important over the next two or three years. Understanding them early gives management more time to evaluate their implications.

So I would look at the exhibition as a benchmarking exercise. How does your present operation, supplier base or technology roadmap compare with what is becoming available in the wider market?

For a CEO or business head, that perspective can be more useful than discovering any single product

Q5. How important is international participation at the Bengaluru edition?

Electronics is inherently a global industry, so international participation adds an important reference point.

The presence of companies from 30+ countries, along with dedicated Country Pavilions from Taiwan, Germany, Japan and China, gives Indian visitors the opportunity to examine different technology and manufacturing ecosystems within one visit.

ELECTRONIC CITY
India's largest circulation monthly magazine

Service Tree is a leading manufacturer and exporter of High-Quality RoHS (load-free) and leaded soldering products. Service Tree have two plants with fully advanced automatic seperate machines for RoHS and Non RoHS soldering products. We are ISO 9001:2015 certified company. Our in-house laboratory-fully equipped with the latest equipments including the fully computerized atomic absorption spectrophotometer, which give a result with three decimal accuracy at each & every stage of production, The material is passed through a stringent quality control system and any possibility of substandard production is prevented.

We have online testing facilities to detect the level of contamination in solder alloy and to ensure the continuity in the flow of flux in solder wire, as non continuity in flux in the wire may lead to dry soldering problems. We are actively advancing soldering technologies of the next generation, such as halogen-free flux, anti-cracking and low melting point solder alloy. services to provide.

Lead Free Solder Stick/Bars

Service Tree offers environment-friendly Lead-Free solder bars/Sticks for electronics, lighting, automobile, and other industries. Service Tree solder Stick is processed form high-quality,virgin metalsin a proprietary method the removes contaminants and reduces dissolved oxides. These alloys form a stronger bond, making them less susceptible to mechanical fatigue. They also offer improved resistance to fatigue from thermal cycles. Our solder Stick is RoHS-compliant and tested By SGS. contact details: **SERVICE TREE, PVT.LTD**. Noida

FAST GROWING BRAND
Service Tree
SOLDER BRAND SERVICE TREE

ELECTRONIC CITY - September 2026

cont..from pg 27

But the objective should not simply be to see foreign technology.

The more useful question is: where is global capability moving, where has Indian capability become competitive, what still needs to be sourced internationally, and where can localisation or technology partnerships make commercial sense?

Global does not automatically mean better for every application, just as domestic does not automatically mean the right fit. Companies need the ability to compare.

That becomes especially important when the investment under consideration could influence production capability for the next five or ten years.

You need a view of the market beyond the suppliers you already know.

Q6. Bengaluru has a strong technology identity. How does the location influence the character of this edition?

Bengaluru gives the exhibition a very relevant industry setting.

The region has a strong concentration of electronics design, embedded technologies, R&D, engineering, aerospace, defence and technology-led businesses. That creates a useful intersection between people developing electronic products and those responsible for industrialising and manufacturing them.

For electronica India, this creates strong relevance for design engineers, product developers, R&D teams and sourcing professionals—particularly in areas such as semiconductor design and advanced electronic system development.

For productronica India, it connects with EMS companies, manufacturing organisations, production teams and businesses evaluating PCB, SMT, automation, inspection and testing technologies.

What I find particularly important is the nature of the conversation this creates.

Discussions can move quite quickly from a product specification to questions such as: Will this work in our application? Can it be manufactured consistently? Can it scale? What will it require from our production line? How do we test it?

That makes the engagement much more useful for both visitors and exhibitors.

Q7. As India advances its ambition to become a global electronics manufacturing hub, what do you see as the next critical steps to strengthen this ecosystem?

The next phase has to be about depth and value addition.

Scale will remain important, but India also needs stronger capability across components, design, PCBs, electronics manufacturing services, automation, testing, process control, quality systems, capital equipment and supplier development.

There also needs to be a much tighter connection between product development and manufacturability.

If we want to move into more sophisticated electronics manufacturing, it is not enough to design a good product. Companies have to be able to manufacture that product repeatedly, at the required quality, at competitive cost and at scale.

This is also why supplier development becomes so important. A strong manufacturing ecosystem cannot depend on a handful of capable companies. It needs depth across multiple tiers of the supply chain.

Platforms such as electronica India and productronica India can support that process by making capability visible. Companies can see where alternatives exist, where technology gaps remain and where new supplier or technology relationships may be worth developing.

And this matters well beyond the electronics industry itself. Stronger electronics manufacturing capability has implications for automotive and EVs, industrial machinery, telecom, consumer products, healthcare devices, aerospace, defence, energy systems and smart infrastructure.

Electronics increasingly sits inside almost every major industrial value chain.

Q8. The India Electronics Conclave runs alongside the exhibition. What does it add to the overall proposition?

The exhibition and the conference serve two different purposes.

The exhibition helps you understand what technology and capability are available. The knowledge programme should help you understand the larger changes influencing why those technologies matter.

The **India Electronics Conclave 2026** programme at **electronica India and productronica India** brings together policy, manufacturing, technology and design priorities shaping India's electronics sector. Key sessions include the Karnataka Electronics Leadership Summit with PwC India; the ICEA Capital Goods Summit on localising capital goods, robotics, automation and testing infrastructure; the CEO Forum with ELCINA on design, IP, component ownership and the ECMS Scheme; the Exports & FTAs in Electronics Sector programme with MEDEPC; and the BPCA Tech Conference: India PCB 2.0 – Catalysed by ECMS Scheme.

The programme also features the eFuture Conference on intelligent electronics, the IEEE Standards Workshop: The Future of EDA – IEEE Standards in Action, a session on Best Practices in EMI & EMC Design and Compliance with EMIS India, the OE-A Symposium on Flexible Electronics with the VDMA Sector Group OE-A, and Engineering for Tomorrow: Design to Manufacturing

Adding a strong technology and learning dimension are the electronica India Tech Challenge pitches, where participants will design an Edge AI-powered wearable or embedded system with HackCulture, and an AI Masterclass with GrowthX/GrowthSchool, featuring two hands-on 90-minute sessions.

For me, the connection between the conference room and the exhibition floor is the important part.

You may spend the morning hearing how an industry issue is developing and then spend the afternoon speaking directly with companies addressing that issue through technology, production capability or supply.

That makes the knowledge programme much more commercially relevant than a standalone conference.

Q9. Several industry associations are involved in the programme. Why does that matter?

Electronics is far too broad for any single organisation to represent every technical and commercial issue with equal depth.

The requirements of PCB manufacturers are different from those of semiconductor companies. Exporters are dealing with different questions from production engineers. Flexible electronics, EMI/EMC, automation and power electronics each have their own technical, regulatory and commercial considerations.

CONT. NEXT PAGE 30

ELECTRONIC CITY - September 2026

cont..from pg 29

That is why participation from organisations and initiatives such as ELCINA, ICEA, MEDEPC, VDMA, IEEE, JETRO and OE-A adds value to the programme.
They bring specialist communities into the discussion.
For visitors, that can help turn a broad conversation about the future of electronics into something much more specific: What does this development mean for my product, my factory, my supply chain or my market?
That level of relevance is important.

Q10. Supplier development is a recurring challenge in electronics. How does the Buyer-Seller Forum address this?

Finding suppliers is one part of the challenge. Finding suppliers with the right capability, quality systems, capacity and long-term fit is much harder.
An exhibition naturally enables discovery, but supplier development requires more focused conversations.

The Buyer-Seller Forum, scheduled across all three days, is designed as a vendor-development platform connecting qualified buyers and sellers around actual business requirements.
For a buyer, the value is in widening the supplier pipeline and identifying companies that may be worth evaluating further.

For suppliers, it offers a better understanding of what manufacturers are really looking for, whether that is a particular technology, production capability, volume requirement, quality expectation or future programme.

think the timing is particularly relevant in electronics because supplier qualification can take time. Technical evaluation, audits, samples, testing and commercial discussions do not happen overnight.
It is far better to build those relationships before a sourcing issue becomes urgent.

Q11. What do initiatives such as the electronica India Tech Challenge bring to an established industry exhibition?

They bring a different lens to established industry problems.
Large manufacturing organisations naturally have to think about reliability, qualification, scalability and commercial viability.
Start-ups, younger technology companies and independent innovators are often less constrained by the way a problem has traditionally been solved.

The electronica India Tech Challenge pitches with HackCulture, scheduled across Days 2 and 3, gives some of those ideas a place within the larger industry environment.

The value is not that every new idea will necessarily translate into an industrial solution.

The value is in exposing established businesses to different approaches and, equally, allowing emerging companies to test their thinking against people who understand manufacturing realities, qualification requirements and scale.
Innovation becomes far more meaningful when those two perspectives meet.

Q12. If you were advising an electronics company on how to approach its visit, what would you tell them?

would tell them not to treat it as a general industry visit.
Before arriving, identify two or three questions that matter to the business.
Perhaps you have a component dependency you want to reduce. Maybe a manufacturing process has become a bottleneck. You may be planning capacity expansion, looking for alternative suppliers, evaluating more automation or trying to understand a technology that is likely to affect your next product generation.
Start there.
Then use the exhibition deliberately.
Meet existing suppliers but make time for companies you do not know. Compare Indian and international alternatives. Attend the conference sessions directly connected to your priorities. Use the Buyer-Seller Forum where it makes sense. And when the decision cuts across functions, bring colleagues from engineering, sourcing, manufacturing or quality into the discussion.

A good trade fair visit should leave you with something that has changed.
It may be a supplier shortlist. It may be an investment assumption you now need to reconsider. It may be a technology you want your engineering team to evaluate. It may simply be a better question for the management team to discuss.

That is a much better measure of value than the number of booths visited.

Q13. Finally, what would you like the industry to take away from electronica India and productronica India 2026?

I would like companies to leave with a clearer view of where electronics technology and manufacturing capability are heading, and what that means for their own business.

The Bengaluru edition is expected to bring together 770+ exhibitors from 30+ countries, dedicated Country Pavilions and a three-day knowledge programme covering some of the issues that are currently shaping electronics design, sourcing and manufacturing. Importantly, it also brings together semiconductor design innovation with the broader electronics manufacturing ecosystem, creating a more complete view of how design and production are converging.
But scale by itself is not the outcome.

What matters is what companies do with that access.
If an engineering team discovers a better technical approach, if a manufacturer identifies a technology worth evaluating, if a sourcing team finds a supplier it should begin qualifying, or if a leadership team recognises a market shift early enough to respond, then the platform has created value.
I
would like people to leave with sharper questions and a clearer next move.
Because ultimately, the most useful outcome of an industry platform is not how much you managed to see over three days. It is whether you understand something differently when you leave, and whether that changes what you do next.

Bhupinder Singh

President – IMEA (India, Middle East, Africa), Messe München

CEO, Messe München India

Bhupinder Singh serves as **President – IMEA (India, Middle East, Africa),** Messe München and CEO, Messe Muenchen India, leading the company's strategic direction and operations across these key growth markets. His elevation to the IMEA leadership role in January 2025 marks a significant milestone, expanding his responsibilities to oversee Messe München's business development, partnerships and regional strategy across India, the Middle East, and Africa.

With over two decades of experience in the global exhibition and trade fair industry, **Bhupinder has transformed Messe Muenchen India from a seven-person start-up in 2007** into one of the country's leading trade fair organizers. Under his leadership, the portfolio grew from **2 to 21 flagship exhibitions** spanning high-impact sectors such as pharma, environmental tech, electronics manufacturing and more.

His broader IMEA mandate reflects Messe München's focus on unlocking synergies and scaling impact across these high-potential markets. His vision continues to drive Messe Muenchen's global growth, establishing a stronger presence in new markets.

Under his leadership, Messe Muenchen India has grown into a robust organization with over **100 employees across three states,** recognized for its operational excellence and market relevance.

Bhupinder is known for his people-first leadership approach, fostering a corporate culture where "People before Strategy" is more than just a philosophy—it's a way of working. His emphasis on open communication, team well-being and purpose-driven performance has shaped Messe Muenchen India into a trusted industry leader and a "People's Company."

His academic foundation includes a degree in Economics from Delhi University, a post-graduate qualification in Business Administration, and a specialization in Marketing from IIM Calicut. Outside of work, Bhupinder is an advocate for continuous learning, leadership development and staying connected to emerging global trends.

MAGNETIC SOLUTIONS FOR A CONNECTED WORLD

ABOUT US

METRONIX is an ISO 9001:2015 Certified Company, are the pioneers and leading manufacturers in the field of Magnetics with more than two decades of experience and are well equipped with state of the art machines, tools and equipment to maintain high quality in various Production operations.

OUR EXPERTISE

We are one of the fastest growing electronics field company in embedded solutions, We involve in industrial products & project designing and development.

Starting from concept and research, we help our customer from hardware designing, software development of prototype and bulk production.

Embedded Solutions | Industrial Product Design | Prototype Development | Bulk Production

OUR PRODUCTS

- IF/RF Coils, Fixed Inductors (Radial & Axial)
- Air Core Coils (Surface & PCB Mountable)
- Ripple Chokes
- Line Filters (Common Mode)
- Width Coils
- Rotator Coils for scope
- Toroid Chokes
- S. M. P. S Transformers (All Geometries, EE8 ~ EE ~ 100)
- Custom Built Transformers
- EFD & PO, ETD, EC, DC – DC Converter Transformers
- Line Driver Transformers
- 1 : 1 Pulse Transformers
- Pot/RM Core & EP Core Transformers
- Linear Transformers from L-164 ~ Type 15 CRGO
- M27 Buzzers Panel Mountable
- Solenoids (Custom Designed)

We also make customise magnetics.

KEY INDUSTRIES WE SERVE

Consumer Electronics | Industrial Applications | Embedded Solutions | Power Electronics | Telecom & Communication | Automotive & Others | Defence Applications

We maintain very cordial relations with our customers since our ultimate motto is "Customer's Satisfaction".

Welcome to Service Tree

INTERVIEW

Forging Strong Connections: The Rise of Service Tree Pvt Ltd in India's Soldering Industry

In today's rapidly evolving electronics and manufacturing landscape, precision is critical—and at the core of this precision lies soldering. From its strategic base in Greater Noida, Service Tree Pvt Ltd is steadily emerging as a trusted name, delivering reliability, performance, and innovation where it matters most.

Located at Plot No. 284, Udyog Kendra 2, Ecotech 3, Greater Noida, India, the company is redefining industry benchmarks with its specialized range of soldering solutions. To gain deaeper insights into its journey and future vision, the team at ELECTRONIC CITY spoke with the leadership of Service Tree Pvt Ltd.

Directors of Service Tree Pvt. Ltd. Mr. Sunil Shukla and Mr. Sandeep Choudhary

Electronic City (EC): Service Tree Pvt Ltd is a unique name. What's the story behind it?

Service Tree Pvt Ltd: The name reflects our philosophy. "Service" represents our commitment to customers, while "Tree" symbolizes growth, strength, and deep-rooted reliability. Just like a tree supports life, we aim to support industries with dependable solutions.

EC: What gap in the market were you aiming to fill when you started?

Service Tree Pvt Ltd: We observed that many industries struggled with inconsistent soldering materials, which affected productivity and product quality. Our mission was to provide products that ensure consistency, precision, and long-term performance.

EC: What defines the quality of your soldering products?

Service Tree Pvt Ltd: Quality for us is non-negotiable. We focus on superior raw materials, controlled manufacturing processes, and rigorous testing. Our products are designed to deliver clean joints, strong bonding, and minimal defects.

EC: How do you stay ahead in such a technically demanding industry?

Service Tree Pvt Ltd: Continuous learning and innovation are key. We stay updated with global trends, invest in R&D, and maintain close communication with our customers to understand their evolving needs.

EC: Greater Noida is becoming a manufacturing hub. How has that influenced your growth?

Service Tree Pvt Ltd: Being in Greater Noida gives us a significant advantage. The industrial ecosystem enables faster logistics, better vendor networks, and access to skilled manpower, all of which accelerate our growth.

EC: Can you tell us about your core product range?

Service Tree Pvt Ltd: We specialize in a wide range of soldering products, including solder wires, solder sticks, paste, flux, and related materials. Each product is engineered to meet diverse industrial applications.

EC: What industries rely most on your products?

Service Tree Pvt Ltd: Our primary clients include electronics manufacturing, electrical assembly units, automotive sectors, and repair and maintenance industries—essentially anywhere precision joining is required.

ELECTRONIC CITY - September 2026

Beyond the Factory: How LED Lighting is Redefining Stadiums, Hospitals, Solar Streets, and Smart Cities in India

When it comes to LED lighting stadiums hospitals smart cities India, the story isn't just about energy savings; it's about precision engineering for high-stakes environments. There is a version of the LED lighting story that never gets old: a factory replaces old technology with high-efficiency LEDs, energy bills drop, and everyone goes home happy. It is a true story. It has been told well. But it is only the beginning of the story.

The more interesting version – the one being written right now across India's infrastructure landscape – is about precision LED engineering applied to environments where the stakes of getting it wrong are far higher than an elevated electricity bill. A stadium where broadcast-quality flicker-free illumination is the difference between a world-class event and an embarrassing technical failure. A pharmaceutical clean room where the wrong light fitting is a contamination risk. A municipal road project where solar-powered LED street lighting extends safe
mobility to communities three hours from the nearest power grid. A commercial tower where architectural lighting defines the entire brand identity of the building.

This is the future of LED lighting stadiums hospitals smart cities India, a story of engineering that deserves telling in 2026. Precision LED lighting stadiums hospitals smart cities India: A Focus on Sports Stadium lighting in India is no longer limited to national cricket grounds and metro football arenas. India's sports infrastructure push – covering district-level sports complexes, university athletic facilities, multi-sport township developments, and the growing ecosystem of professional sports leagues – has created significant demand for broadcast and performance-grade outdoor stadium lighting.

KP Green Engineering Limited

A COMPANY TO SOLVE THE DIFFICULTIES
BSE Listed Company

KP Green Engineering is a trusted and reputable name in designing and supplying high mast towers, providing modern facilities with innovative solutions for infrastructure, industrial, and public utilities. Our high mast lighting towers are designed with quality engineering above all else to guarantee optimum illumination, safety, and durability.

High mast poles

KP Green Engineering embraces robust high mast poles designed from quality steel protected through hot dip galvanization. The level of protection ensures corrosion-free under extreme weather and environmental wear. As we are among the finest high mast light tower producers, we combine the best in engineering principles with industry-leading manufacturing to provide world-class solutions. Our towers are often the choice for stadiums, highways, industrial facilities, airports, and large outdoor areas needing consistency and power of lighting.
KP Green Engineering is consistently recognized among reputable high mast pole suppliers in India. We provide selected designs based on customer specifications while also ensuring delivery to performance and safety expectations. Our galvanized high mast towers provide reliable performance, reduced maintenance, and longevity.

Mono Pole Towers

KP Green Engineering produces durable Mono Pole Towers that are built from quality steel and designed for rigidity, strength, and longevity. The slim and compact construction of Mono Pole Towers provides a great alternative to traditional lattice towers when space is at a premium.
We specialize in a variety of offerings - notably our range of Telecommunication monopole tower systems, which provide reliable support for antennas and communication infrastructure. Additionally, we design and manufacture Transmission monopole tower and Power line monopole available for the renewable energy sector, where reliable and space-saving structures to transfer power is a growing necessity.
As Monopole tower manufacturers, we have advanced fabrication technologies to deliver world-class quality Monopole towers and continue to have a strong mark as Monopole tower suppliers in India. We offer a complete solution from design to manufacturer, to professional Monopole tower installation, making each project with us an effortless experience.

OHAS ELECTRIC

OHAS Electrical Pvt Ltd, established in February 2023 in Noida, Uttar Pradesh, is a certified manufacturer of LED lighting systems engineered for industrial, commercial, and infrastructure use. Our team brings together deep technical expertise in optics, thermal design, and power electronics to deliver products that meet the toughest performance standards in the field.

Why Work With OHAS?

- **In-House Manufacturing:** Full control from PCB assembly to final QC at our ISO-certified Noida plant.
- **Energy Saving ROI:** Most products deliver payback within 12-18 months through reduced energy bills.
- **2-5 Year Warranty:** Covering both electronics and body—backed by service response within 48 hours.
- **Project Engineering Support:** Lighting layouts, lux simulations, and load optimization for tenders or private projects.
- **Nationwide Logistics:** Ready-to-ship stock and delivery across India through our dealer/distributor network.

MAYFAIR® SINCE 1964

Established in the Year 1964, We at **"Mayfair"** offer a variety of lighting solutions for Commercial, industrial, Residential & Outdoor Lighting. With over 5 decades of lighting experience, we are the one of the leading manufacturers and suppliers of a wide range of Lighting fixtures, LED Luminaries, Octagonal & High Mast Poles and other accessories.

These products render a really distinctive & sophisticated look in Banks, Offices, Schools & Colleges, Residential Complexes, Resorts, Hotels, Industries, Highways, Petrol Pumps, Yard Lighting and Stadiums.

Our Marketing team is our greatest & strongest resource that posses a profound and intense depth of knowledge in the respective field of Lighting. Owing to the dedicated efforts of our team, we always meet the targets and goals set by our organization. Our team guides our clients with our range of products as per their specific requirements. For sustaining our goodwill in the market, we also strive hard to provide the products and services within the stipulated time frame. At MAYFAIR quality, trust and reliability is our motto of working and hence our manufacturing is being looked after by qualified engineers.

Our personnel engaged in in production & Testing processes are well trained via numerous training sessions.

We at Mayfair believe in "Make In India" and have developed an advanced infrastructure which is segregated into different units such as manufacturing, quality assurance, warehousing and R&D and has all the sophisticated and latest machinery that in turn helps us to deliver the best qualitative products to the customers

Velocity

Automatic Copper Wire Stripping Machine

This automatic copper wire stripping machine is designed for high-efficiency wire processing, handling a wide range of wire sizes from 1mm to 45mm in diameter. Perfect for scrap yards, recycling plants, and electrical industries, it allows quick and easy removal of insulation from copper wires, maximizing productivity and metal recovery.

Wide Range Compatibility: Processes wires from 1mm up to 45mm, making it versatile for multiple wire types.
High Efficiency: Automatic feeding and stripping function, reducing labor and boosting efficiency.
Durable Construction: Built with high-quality materials to ensure long-lasting performance even with heavy-duty use.
Easy Operation: Simple controls make it user-friendly, suitable for both small-scale and industrial applications.
Safety Features: Includes protective mechanisms to prevent accidents and ensure user safety during operation.

Range of Machines :

- **Harness Industry Machines**
- **Wire Cutting & Stripping Machines**
- **Fully / Semi Automatic Crimping Machines**
- **Fully / Semi Automatic Soldering Machines**
- **Vertical Injection Moulding Machines**
- **Laser Printing Machines**
- **Testing Machines**

KSS SINCE 1969

We at **Krishna Electronics**, have become one of the recognized firms engaged in supplying and exporting an exclusive range of electrical wiring accessories for electronic and electrical and automobile industries. In our wide range, we offer nylon cable ties, self adhesive cable mounts, cable tie mounts, cable clips, p c b supports, p v c wiring ducts and cable markers. Apart from this, we also offer cable glands, strain relief bushing, closed end wire connectors, heat shrinkable tubes, snap rivet, tie tools & flex duct cutter and cord end terminals. These are quality tested on well-defined parameters before being delivered to our clients.

We have achieved a firm grasp in the domain pertaining to an extensive experience of our mentor Mr. Dinesh Kumar Modi. It is under their able guidance we are able to establish ourselves as one of the leading names in the field of electrical wiring accessories. Moreover, with the consistent efforts of our advanced R&D unit we have introduced innovative designs and improvisations in our range of products. They continually strive to usher new designs and technologies to offer the best of products to our clients with the help of our overseas partner "KSS" Taiwan,one of the Asias NO 1 company in the field of electrical wiring accessories and we act as an sole distributor in INDIA for the brand 'KSS' since 1996.

Service Tree - CONT..FROM PG 34

E C : How important is innovation inyour product development?

Service Tree Pvt Ltd: Innovation is critical. As technology evolves, so do the requirements for soldering materials. We continuously work on improving efficiency, reducing waste, and enhancing performance.

EC : What roledoes customer feedback play inyour business?

Service Tree Pvt Ltd: It is invaluable. Customer feedback helps us refine our products and services, and many improvements are directly inspired by real-world usage and client suggestions.

EC : How do you ensuretimely delivery and reliability?

Service Tree Pvt Ltd: We have streamlined our supply chain and maintain strict operational discipline to ensure our clients never face delays or inconsistencies.

EC : What challenges have you faced as a growing company?

Service Tree Pvt Ltd: Competition and maintaining consistent quality at scale are ongoing challenges. However, our focus on process control and strong customer relationships helps us navigate them effectively.

EC : What sets Service Tree Pvt Ltd apart from competitors?

Service Tree Pvt Ltd: Our dedication to service, transparency, and long-term partnerships. We don't just sell products-we provide complete solutions that help our clients succeed.

EC : How do you approach sustainability and environmental responsibility?

Service Tree Pvt Ltd: We are mindful of our environmental impact and continuously explore ways to make our processes more sustainable, including reducing waste and improving efficiency.

EC: What advice would you give to businesses choosing soldering products?

Service Tree Pvt Ltd: Never compromise on quality. The right soldering material significantly impacts product performance and durability. Always prioritize reliability over short-term cost savings.

EC: Where doyou see Service Tree Pvt Ltd inthe next five years?

Service Tree Pvt Ltd: We aim to become a recognized leader in the soldering industry, expanding across India and exploring international markets while continuing to innovate and grow.

EC: Finally, what message would you like to share with your customers and partners?

Service Tree Pvt Ltd: We are committed to growing with you. Your success is our success, and we will continue to deliver products and services you can trust.

Conclusion

With a strong vision, a commitment to excellence, and a customer-first approach, Service Tree Pvt Ltd is not just building products-it's building trust. As industries demand higher precision and reliability,this Greater Noida-based company is well positioned to become a key player in India's manufacturing ecosystem.

Enthu Technology Solutions India Pvt. Ltd. is an ISO-Certified Organization founded by a group of young Entrepreneurs in 2007 and incorporated as a Private Limited Company in 2015. We offer best-in-class end-to-end Product Design, Development, and Manufacturing services for Embedded and IoT products. As a product development R&D company, we have in-house Hardware Design and Prototyping, Software Development, EMS Assembly, Enclosure Design & Manufacturing, IoT Cloud based Web & Mobile App Development, product testing, and Deployment. As a Solution Provider, we offer complete digital transformation for all your problem statements under one roof. We have a tremendous track record of bringing up new start-up entrepreneurs by establishing their product manufacturing facility with PCBMATE & SMTMATE Products. We provide best-in-class OEM & ODM Services to our clients based on their demands. On behalf of the Industry Institute Collaboration, we are operating Enthu Academic Solutions to fill the gap between the Industry and Institute by offering laboratory establishment, real-time exposure to research activities, and other Industrial training and developments that would benefit the institutes and the industry.

Electronic Manufacturing Service Product

At EnthuTech Solutions India Pvt Ltd, we deliver comprehensive Electronic Manufacturing Service (EMS) solutions through our industry-proven SMTMATE® and PCBMATE® product lines. With over a decade of expertise in SMT manufacturing, we empower start-ups, EMS companies, R&D centers, and educational institutions to build world-class electronic assembly facilities that meet global quality standards.

We are a trusted SMT vendor in India, offering OEM and ODM services tailored to every customer's production requirement—from prototype development to full-scale mass manufacturing. Our commitment to precision, performance, and sustainability enables clients to reduce time-to-market and improve manufacturing ROI.

SMT Products–Complete SMT Manufacturing Solutions

Our SMTMATE® series represents the future of Surface Mount Technology. From entry-level desktop lines to fully automated high-speed SMT assembly systems, each model delivers reliable performance, flexible feeder configurations, and repeatable accuracy.

PCB Products–Next-Generation PCB Fabrication

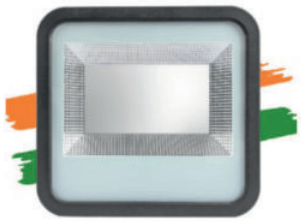

The PCBMATE® series transforms PCB prototyping and small-batch fabrication with an eco-friendly, chemical-free milling process. Each model delivers micron-level precision for antenna fabrication, IoT device prototyping, RF circuit development, and academic research.

Desktop Vesion SMT Pick & Place Machine

NeoDen YY1

NeoDen YY1 is a Low-Cost Desktop SMT Mounter with Two Nozzle and Three Auto nozzle changer Option, 103 Feeder Location, Dual camera Vision system, High Accuracy placement, Loose, Cut Tape component Pickup.

Machine is Having a very User-Friendly GUI with which reduces the Learning curve of the software, and the user can master it in few Hours. NeoDen YY1 is very well suited for R&D institutions, small scale Production Units, Hobbyists, who will be having various circuits to assemble with loose/cut tape /Strip components in hand. Considering the work ability factor on the machine it gives a very flexible nature of mounting the PCB for job, user can fix the PCB anywhere on the working bed, unlike similar machines which have dedicated Set Zero point.

NeoDen YY1 is a Powerful Mounting machine with the use of Latest Cortex MCU Engine and the very new technology Drive Systems, Pneumatics, Component reel movement, Image Capture and Recognition.

Features

- Ultra-Fast & Easy Programming Touch User Interface
- Auto Nozzle Changer
- High Speed HD Camera
- Reel Feeder Magazines
- Dual Head with Vacuum Indication
- Loose Component Tray
- Linear Needle Module
- Stick Vibrating Feeder

Vertical Standalone Pick & Place Machine

NeoDen N8

NeoDen8 features 8 simultaneous pick-up heads, has been designed for ease of use, efficiency, cost effectiveness and increased expand ability and compatibility. Using new, highly efficient linear servomotors, lightening and stiffening the head unit, and reviewing the placement speed of 16,000 CPH.

Features

- 8 Synchronized Nozzles which ensure a repeatable placement accuracy with high speed.
- Machine runs on highly stable and secure Linux operating system.
- Double mark cameras to reach at extreme end feeders for better calibration.
- High resolution and high-speed component camera system improves the overall speed of the machine.
- Ethernet communication interface for all internal signal travel makes the machine to perform more stable and flexible.
- Closed loop Servo control system with feedback makes the machine to function more accurate.
- Picking location of pneumatic feeder can be calibrated automatically and promptly, to ensure easy operation and high efficiency.
- PCB location can be calibrated automatically and promptly, based on the correct and specific placement request.

EVERYTHING YOU'RE ABOUT TO DECIDE IS ALREADY HERE.

From components and semiconductors to PCB, electronics production, testing and automation—this is where the entire electronics value chain comes together **at electronica India and productronica India.**

And if your next **BOM, build, batch, line upgrade, supplier shortlist or quality check** is already in motion, then you already know: decisions made in isolation are the most expensive ones.

THIS IS YOUR WINDOW TO GET IT RIGHT - BEFORE OTHERS DO.

- **BOM** | Lock in the right components before shortages or price shifts
- **LINE UPGRADE** | Avoid costly wrong investments in automation
- **BUILD** | See what your competitors are already evaluating
- **SUPPLIER SHORTLIST** | Meet partners before your competitors lock them in
- **BATCH** | Validate production readiness before scaling
- **QUALITY CHECK** | Prevent failures before they reach the field

IF YOU WAIT FOR THE NEXT EDITION, YOU'RE ALREADY LATE.

YUNFANG SOLDER

Lead Free Solder Paste

Lead Free Solder Paste Mesotherm 178 Sn64Bi35Ag1SMT PCB Manufacturers.

Being one of the renowned organizations in the industry, we are highly engaged in providing a premium quality range of YF-H-10 Solder Paste. YF-H-10 lead-free medium temperature no-clean solder paste is made by mixing low-oxidation tin powder with high-efficiency flux in a vacuum environment. The solder paste is stable at room temperature and can release the activity rapidly when reflowed. The solder has good fluidity and strong wettability after melting. This solder paste can be widely used in thermal modules, LEDs, tuner and other products that require medium and low temperature soldering.

YF-H-10 does not contain any halogens. Although halogen is excluded from the formulation, the breakthrough formulation allows it to have excellent solderability and excellent wettability for OSP copper, HASL tin, silver or nickel pads, reflow soldering The light is full and black. The residue is colorless, transparent, non-corrosive and has the highest safety performance in the industry.

YF-H-10 has a wide reflow window and can adapt to a variety of reflow profiles. The solder joints of different endothermic parts can obtain a good and consistent welding effect.

Lead Free Solder Wire

Leading Manufacturer of solder wire sn99ag0.3cu0.7 tin wire lead free tin solder with rosin core, yunfang metals aluminium sn42bi58 solder wire, solder wire sn99.3cu0.7 tin wire lead free tin solder with rosin core, solder wire sn96.5ag3.0cu0.5 tin wire lead free tin solder with rosin core, lead free silver solder wire, for soldering electronics and sn99.3 cu0.7 solder wire.

SN99AG0.3CU0.7 is a low residue cored solder designed for no-clean soldering applications that must meet all appropriate Bellcore specifications. The unique blend of rosin and proprietary activators provide rapid wetting while leaving minimal, optically clear, completely inert residue.

High-performance, fast wetting cored wires that meets the most reliability criteria.

For all hand and automated soldering, component attach and rework operations

Minimal, non-corrosive flux residues for high soldering efficiency.more details.

RIGOL DG5000 Pro Series

The DG5000 Pro Function/Arbitrary Waveform Generator is RIGOL's new generation of isolated waveform generators. Based on the Si-Fi II technology platform, it achieves a maximum sampling rate of 2.5 GSa/s, an output frequency of 500 MHz, and a 16-bit vertical resolution, along with several new feature upgrades to meet the needs of

various industries and application scenarios.

Dual-Channel Ground Isolation : Eliminates interference and noise caused by ground loops, enhancing output stability and protecting components and circuits are sensitive to potential differences.

High Sampling, Low Distortion: With a 2.5 GSa/s sampling rate and a maximum output frequency of 500 MHz, the DG5000 Pro provides stable assurance for your waveform outputs.

The DG5000 Pro series supports a 170 MHz square wave, with a rise time as fast as 0.8 ns (typical).

High-Fidelity Signal with Low Jitter: Utilizing RIGOL's Si-Fi II high-fidelity signal technology, jitter is reduced to as low as 200 ps. Point-by-point output ensures stable, non-fluctuating waveforms.: for more info contact us:

Eetamax is a manufacturer and supplier of high-performance industrial lights and lighting control solutions. With over two decades of experience in the lighting industry we offer most energy efficient lighting solutions with high efficacy. Our Core competence is developing, manufacturing, and selling industrial and infrastructural purpose lighting systems.

We make 300+ products for a wide range of Indoor and outdoor applications. We extend our expertise to provide connected lighting control solutions based on DALI, RF, and other IOT technologies.

Eetamax has a state-of-the-art design facility equipped with photometric, thermal and electronics labs. Our manufacturing facility is located in Maharashtra, India.

Eetamax boasts a loyal customer base of many multinational corporations spread across the country.

Manufactured in ISO 9001:2015 certified setup our products are BIS approved as well as tested at MSME test lab and ERDA.

The solutions are designed to include features like Daylight Harvesting, dimming, scheduling, energy monitoring, and fault detection & diagnosis.

Melon Designer Lighting

Melon LED Lights are a smart innovation in the future of lighting. They provide simple and lasting lighting solutions to the user. Advance technology, energy efficiency and durability, giving in a clear edge. They are developed specially to optimize their output, outshining many other lights in the market. Melon LED lights are superior quality products priced fairly, Melon LED lights offer a wide

range of international quality LED lighting solution, for varied applications providing effective and energy-efficient lighting in any environment. Their range usage ranges from residential, commercial and industrial applications.

SUN ENERGY INDIA PVT LTD

Sun Energy India Pvt Ltd is the most promising manufacturer and Service provider company, driven with a mission to become a niche player in the development of innovative LED lighting, Solar Products and Automation Products. We offer a wide spectrum of Solar Products, LED Lighting System, Entrance Automation and Factory Automation Solutions.

Our modernized R&D centers bear testimony of our widely demanded product portfolio featuring comprehensive benefits of the latest technology, rugged designs, energy efficiency, and cost competitiveness.

Our profound interest and forward-thinking approach are adding value to the industry make us the fastest growing manufacturers of solar lighting and automation products. Further, our business models are based on the pivot of total quality management.

Our products are manufactured with compliance to the highest industry standards of quality and feature intelligent technology to provide precise outputs. Also, due to the assiduous efforts of highly experienced team members, we can explore world-class technology and already on the verge of greater expansion in the domain of solar lighting and Automation products.

Solar Street Light

Solar Street Light Manufacturer in India
Looking for a trusted Solar Street Light Manufacturer in India? Welcome to Wolta Power System, your reliable partner for high-quality solar lighting solutions. We manufacture and supply energy-efficient solar street lights for roads, highways, villages, industries, schools, parks, commercial areas, and government projects across India.

As a leading Solar Street Light Supplier in India, we focus on quality, durability, and long-term performance. Our solar lighting systems are designed to reduce electricity costs while providing bright and reliable illumination.

Trusted Solar Street Light Manufacturer in India
Wolta Power System is known for manufacturing premium solar street lights that perform well in all weather conditions. Every product is built using quality solar panels, efficient LED lights, durable batteries, and advanced charge controllers.
Being an experienced Solar Street Light Manufacturer in India, we understand the lighting needs of residential, commercial, industrial, and public infrastructure projects. Our products are tested to ensure excellent performance and a longer service life.

Reliable Solar Street Light Supplier in India
As a dependable Solar Street Light Supplier in India, we deliver products to customers across the country. We maintain strict quality standards and ensure timely delivery for every order.
Whether you need a few units or bulk quantities, Wolta Power System provides the right solar lighting solution at competitive prices. Our experienced team also helps customers choose the most suitable model for their project.

Our Solar Street Light Range
We manufacture and supply a complete range of solar lighting products,

"KUSAM-MECO" AC / DC TRMS Clamp-On Multimeter with VFD, EF-Detection, PC Interface for Solar Application

MODEL - KM 3001

"KUSAM-MECO" has added yet another High Safety 'UL' listed unique AC/DC TRMS Clamp-on-Multimeter with VFD, EF-Detection, PC interface for solar Application. It is one of its kind of clamp multimeter having so many functions packed in one instrument which even "Phoren Brands" do not have.

It has 1500V DC Volts range specially suitable for Solar applications, Autocheck for Voltage & Ohms Function, VFD-V & VFD-HZ Function, 5ms CREST-Max Capture Mode (Peak Hold) Autoranging, Relative Zero Mode, EF-Detection (NCV), Backlight LCD Display, Auto Power Off. It has a Jaw Opening of 55mm. It has 3-5/6 digits (6000 counts) and 3½ digits (1999 counts) for Hz. It has a fast update rate of 5/second. To preserve the battery it shuts off after 34 minutes of no activity. It has Transient Protection of 12 kV (1.2/50ms surge) not found in any other similar clamp meter in India. The Electrical specifications include AC current upto 2000 Amperes, DC current up to 2000 Amperes, DC+AC current upto 2000 Amps, DC voltage upto 1500V DC, AC volts upto 1000V AC, VFD-ACV,HZ Line level Frequency capacitance, Non-contact EF-Detection, Audible continuity Test, AC+DC Voltage, Resistance, Temperature, Diode Test CREST-MAX (Capture Mode).
The instrument is supplied with manual, batteries, Bkp60 banana plug type K-Thermocouple, test leads, Carrying case. Optionally software can be supplied to download the data to PC.

ELECTRONIC CITY - September 2026

Siricom Technology is an international open market distributor exclusively of Surface Mount Chip components. Founded in 1993, we are the first people to introduce Surface Mount Chip components across South India in Rupee payment. Our customer base includes OEMs, Space, Defence, Healthcare, Automobiles etc., as well as many contract manufacturers. Over the years, Siricom itself established as one of the preeminent specialty distributor for SMDs.

SMD High Power Resistors

The high power resistors are constructed in a high grade ceramic body . This standard specification is for use in consumer electronics, computers, telecommunications, control instruments ..etc. It is composed by type, Rated Wattage, Nominal Resistance and Tolerance.

Siricom Technology stocks broad array of SMD actives and SMD semiconductor product lines. The company specializes in a wide variety of passives from 0201 to 2512 size chip resistors, 0201 size to 2225 size chip capacitors, Chip tantalums from A case to V case, chip inductors from 0402 to 1812.SMD semi - conductors of SOT 23, SMA, SMB, SMC, D pack, D2 PACK, SMD ICs, of SOT 353,SOIC, SSOP packages etc., From reputed manufacturers across the Globe.

Siricom Technology having policy of introducing every year at least two types of SMD components for India Design Engineers after through study and analysis market requirements while taking care of prices of SMDs on comparison with TH parts, availability of equivalents, delivery and regular supply these components. An effort in this direction has made components recent years to stock and sell of SMD Power Inductors, SMD xtals both 2pin and ceramic 4pin. High wattage SMD resistors, SMD Buzzer etc.,

Siricom Technology assures high quality components, sanctity of make, part number, specs, are maintained all the time even for cut reel components in the present scenario of components market.

An advantage the customers can have with SIRICOM is that, they get wide range of SMD components in single GO/PO, which saves lots of procurement time and money.

JUNNA SOLAR SYSTEMS LIMITED

HOW DO SOLAR PANELS PV WORK?

PV cells are made from layers of semi-conducting material, usually silicon. When sun light shines on the cell it creates an electric field across the layers. The stronger the sunshine, the more electricity is produced. Groups of cells are mounted together in panels or modules that can either be mounted on your roof or on the ground. The power of a PV cell is measured in kilowatts peak (kWp). That's the rate at which it generates energy at peak performance in full direct sunlight during the summer. PV cells come in a variety of shapes and sizes. Most PV systems are made up of panels that fit on top of an existing roof. Junna solar is a leading manufacturer of high quality solar photovoltaic modules. We assure high performance, High efficiency and durability with a limited warranty period of 25 years.

Junna Solar's modules introduced innovative three bus bar cell technology. Our meticulous design and production techniques ensure a high-yield, long-term performance for every module produced. Our accurate quality control and in-house testing facilities guarantee **junna Solar's** modules meet the highest quality standards possible. **www.junnasolar.com**

LIGHTING BRANDS

celebration of silver jubilee years on 2027
ELECTRONIC CITY
India's largest circulation monthly magazine

All-in-one solar street light focus on integrated, compact lighting units with solar panels, LEDs, batteries, and controllers in one housing, highlighting their ease of installation, sustainability (zero emissions, less wiring/trenching), smart features (PIR sensors, remote monitoring), and cost-effectiveness for urban and rural projects, contrasting them with split systems, while emphasizing component quality (LiFePO4 batteries,) for reliability and efficiency in smart city applications.

Definition & Components: all-in-one (AIO) lights combine the solar panel, LED module, lithium battery, and charge controller into a single unit, unlike traditional split systems

Technology & Efficiency:

Solar Panels : High-efficiency monocrystalline panels with positive tolerance.

Batteries : Durable LiFePO4 (Lithium Iron Phosphate) batteries with long cycle life controllers: MPPT (Maximum Power Point Tracking) controllers for better energy harvest and integrated Battery Management Systems (BMS) for protection.

Introduction

In our efforts in achieving our goal and to stay focused on our Mission, we offer these Green Energy Management products and services.

- GEM* iSMART UPS inverters with UPS and LFP (Lithium Ferro Phosphate) batteries in a single, compact, light weight and space saving box that last long.
- GEM* iSMART compact, energy efficient, high discharge, long lasting LFP batteries for home Inverters, Industrial power back-up systems, 2-wheeler EVs, 3-wheeler EVs and 4-wheeler EVs as replacement to Lead Acid batteries that are hazardous and highly polluting.
- GEM* iSMART Zero pollution Solar energy generation and LFP battery-based UPS Inverter and Online UPS.
- GEM* iSMART UPS and online UPS when you cannot replace existing Lead Acid based UPS Inverter systems, but improve performance.
- High-speed Hyperloop by mentoring design, integrating vehicle mechanical systems.

Manufacturing of Hyperloop Vehicles for the Test Phases. Designed automated heavy duty battery swapping system for buses and trucks that lifts 1-ton batteries and swaps in 2 min cycle time. Developed Heavy battery storage systems for bulk storages.

Designed, developed and produce metal casings for Lithium based batteries of all sizes and shapes, UPS, online UPS and Solar power back-up systems.

OPTIKS MECHATRONICS

Optical LED Lens solution in the lighting industries

Optiks Mechatronics Pvt. Ltd. was founded in 2015 June in Greater Noida (U.P) India, and gathered with our experienced experts in Optical design, Mechanical design, Mould design & Optical plastic injection. We provide high precision & stable optical components to our customers. We design and manufacturer optics for the emerging solid state lighting companies such as Cree, Edison, Lumileds, Nichia, Osram, Samsung, Seoul, and other LED Manufacturers.

LED Neon Flex - 18W RGBW

Introducing LED Neon Flex, our innovative lighting solution tailored for dynamic RGB illumination. Designed with top/side bending capabilities, it effortlessly conforms to curved walls or structures, offering a versatile option for facade illumination and outdoor spaces. With its adaptability and unique lighting effects, LED Neon Flex brings style and flexibility to any environment. Whether accentuating architectural features or enhancing outdoor landscapes, this cutting-edge fixture promises to illuminate your surroundings with unparalleled flair. Explore the possibilities and elevate your lighting design with LED Neon Flex.

LED Neon Flex - 12W 3D Bend

Introducing our LED Neon Flex, a versatile lighting solution delivering 12W at DC24V with a remote driver. Featuring a diffused beam angle, it ensures a soft and uniform glow. With an impressive IP rating of 65 to 67, it is resistant to dust and water, making it suitable for various indoor and outdoor applications. The Neon Flex comprises 140 LEDs per meter, providing ample brightness. Its 3D bending direction capability adds flexibility to creative designs, allowing for dynamic and unique lighting arrangements in any space. Illuminate with style and durability with our LED Neon Flex.

LED Neon Flex - 8W Mono Color

Discover our LED Neon Flex, an 8W wonder engineered for mono-color lighting. Powered by DC24V with a remote driver, it offers flexibility and efficiency. Its diffused beam angle ensures uniform illumination, while its IP rating of 65 to 68 makes it resistant to dust and water, ideal for diverse environments. With 120 LEDs per meter, this neon flex delivers vibrant and energy-efficient lighting for both indoor and outdoor settings. Illuminate your space with the brilliance and adaptability of LED Neon Flex, effortlessly creating visually stunning effects. Whether enhancing an indoor ambiance or accentuating outdoor landscapes, our LED Neon Flex provides a versatile lighting solution that adds a touch of elegance to any setting.

"Fine Shade" (A Unit Of Complete Printing Solution) are foremost manufacturer, trader and supplier of highly reliable assortment of Pad Printing Machine, Heel Tampography Machine, Silicone Printing Pad, Pad Printing Ink and Pad Printing Sample.

Fine Shade
(An ISO 9001: 2008 Certified Co.)

Incepted in the year 2007 at Faridabad (Haryana, India), we are supported by state-of-the-art infrastructural base. The infrastructural base comprises various divisions such as procurement, production, quality testing, R & D, warehousing & logistics, etc.

Our offered array of machine is designed and manufactured with high precision by utilizing top-notch quality components and cutting-edge technology under the supervision of quality controllers. Acknowledged for features such as simple controls, easy to operate, require less ink, high quality resolution and high output, the machine range is widely demanded in Automobile Industry, Toys Industry, Paper Industry, Cloth Industry, Medical Industry, Electronic Industry, etc.

We provide our machine range in various technical specifications to cater the variegated requirements of clients in economical manner. At our advanced quality testing division, the entire product range is rigorously tested to ensure high performance and functionality at users end.

We have hired highly experienced team of quality auditors to perform quality testing. CONTACT : **fineshade@ymail.com www.fineshade.in**

ELECTRONIC CITY - September 2026

Welcome to Paramount Products – your trusted source for cutting-edge audio, video, USB, computer, and mobile connectors. Established in the vibrant city of Delhi, we take pride in delivering top-notch connectivity solutions tailored to meet your diverse needs.

Interview with Paramount Products, a leading player in the world of connectivity solutions. We have the pleasure of speaking with Mr.Lucky Arora, a Managing Director from Paramount Products,Thank you for joining us ,

Mr. Lucky Arora - M. D.

Q 1: Could you provide an overview of Paramount Products and its journey in the industry of connectivity solutions?

Ans.: Certainly. Paramount Products has been a cornerstone in the connectivity industry, based in Delhi. Our journey has been marked by a commitment to delivering high-quality audio, video, USB, computer, and mobile connectors. We strive to stay ahead in the tech landscape, embracing innovation and providing top-notch solutions to our customers.

Q2: Paramount Products is known for its emphasis on quality. Can you elaborate on the testing and quality assurance processes your products undergo?

Ans.: Absolutely. Quality is a non-negotiable aspect of our products. Each connector undergoes rigorous testing to ensure it meets and exceeds industry standards. From durability to performance, we take every measure to guarantee that our customers receive reliable and superior-quality products.

Q3: Paramount Products offers a wide range of connectivity solutions. Could you highlight some of your flagship products and their unique features?

Ans.: Certainly. Our product range is diverse, catering to various needs. Flagship products include state-of-the-art audio and video connectors, USB cables, computer peripherals, and our specialized multi-pin USB charging cables. These cables are designed with innovative features to enhance user experience and meet the demands of today's digital world.

Q4: Innovation seems to be a key focus for Paramount Products. How does the company stay ahead in terms of technology and incorporate innovation into its products?

Ans: Innovation is indeed a core value for us. We closely monitor technological advancements and integrate the latest features into our products. Our R&D team is dedicated to exploring new possibilities, ensuring that our customers benefit from cutting-edge solutions that align with the fast-paced evolution of technology.

Q5: Paramount Products emphasizes a customer-centric approach. How does the company prioritize customer satisfaction, and what measures are in place to ensure a positive customer experience?

Ans: Customer satisfaction is paramount to us. We prioritize prompt and personalized customer service. Our team is dedicated to addressing customer needs, providing assistance, and building lasting relationships. Feedback is valued, and we continuously strive to enhance our services based on customer experiences.

Q6: The website, serves as a gateway for customers. How does Paramount Products use its online platform to engage with customers and showcase its products?

Ans: Our website is designed to be user-friendly, allowing customers to explore our product catalog seamlessly. We leverage the platform to provide detailed information about our products, share insights into the world of connectivity, and offer a convenient avenue for customers to make informed decisions.

Q7: In conclusion, what message would you like to convey to potential customers and those interested in Paramount Products?

Ans: We want to express our gratitude to our customers for choosing Paramount Products. Our commitment to quality, innovation, and customer satisfaction is unwavering. Connect with us, explore the possibilities, and experience connectivity redefined. Thank you for being part of the Paramount Products journey.

Thank you, Mr. Lucky for providing valuable insights into Paramount Products and its contributions to the connectivity industry. We appreciate your time.

This concludes our interview with Paramount Products, a company dedicated to connecting excellence in the world of audio, video, USB, computer, and mobile connectors.

Correspondent Team - ELECTRONIC CITY

about Paramount : Established in the year 1962, we 'Paramount Product' are one of the trusted Manufacturer & Supplier of wide ranging Connectors, Plugs and Jacks like RF Connectors, Charger Connectors, five pin connector, RCA plug, RCA jack, RCA socket12, RF plug, RF socket, HDMI connectors, stereo pin, double stereo pin, headphone connector, headphone plug XLR Plug & Jacks. Our range is widely demanded by our esteemed clients for its quality features such as corrosion resistance, durability, accurate dimensions and fine finish. Moreover, our presented collection finds broad application in many different areas in order to suit individual requirements of industries. Furthermore, our range is available in various specifications and can also be customized as desired by the clients.

These products are a result of extensive research and development work. Our R & D unit helps us to improve and upgrade the range by incorporating new technology. Our organization is well-supported by sound infrastructure equipped with the hi-technology and the most modern machinery. Apart from this, we have tremendous workforce of skilled professionals, who handles the whole business activities and work in coordination with each other to accomplish the predetermined objectives of our company.

Furthermore, with the help of our skilled professionals, we are able to carry out the complex manufacturing processes. Our organization never compromises on quality and ensures that the products are as per the industry standards. For the benefit of our clients, we offer them prompt customer care support. Further, our professionals try to resolve all the issues of clients and assist them with the products.

We are constantly supported by 'Mr. Lucky Arora', whose year long experience in the domain has carved a niche for ourselves in the domain. Their rich industry experience along with strong business acumen have helped us in garnering a huge client base across the nation.

Supreme Circuits

A Trusted Leader in Printed Circuit Board Manufacturing

For over 35 years, Supreme Circuits has been a reliable and trusted name in the manufacturing of high-quality Printed Circuit Boards (PCBs). Certified to ISO 9001:2015 and ISO 14001:2004 standards, Supreme Circuits is dedicated to delivering top-notch quality, efficiency, and competitive pricing, all while maintaining a strong commitment to advanced technology and sustainability. Here's an overview of their wide array of products, industry-leading turnaround times, and dedication to customer satisfaction.

Broad Range of PCB Products

Supreme Circuits offers a diverse selection of PCBs tailored to various industries and applications. Their product lineup includes:

- **Single Side PCBs:** Ideal for simple and cost-effective circuit requirements.
- **Metal Core PCBs:** Designed for high-performance thermal management, ranging from 1W/m* to 9W/m*.
- **Rigid Flex PCBs:** Combines the best of both rigid and flexible PCB technologies for compact and durable designs.
- **Double Side PCBs:** Suitable for applications requiring routing on both sides of the board.
- **Multilayer PCBs:** Available from 1 to 12 layers, these PCBs are perfect for complex circuitry needs in advanced electronics.

With this wide product range, Supreme Circuits can meet the demands of small, prototype builds as well as high-volume production runs

Mr. KV Sood
Vice President-IPCA
M.D. Supreme Circuits

Quick Turnaround Delivery: Industry-Leading Speed and Flexibility

Supreme Circuits is known for its quick turn prototype and bulk PCB services, ensuring rapid delivery without compromising quality. Their delivery schedules are tailored to meet various urgency levels:

Prototype PCBs (Single Sided, MC PCBs, Double Sided PCBs): Delivered within as little as 12 hours, with options for 36-hour and multi-day deliveries based on the customer's timeline.
Prototype Multilayer PCBs: With a comAmitment to speed, these can be ready within 3 to 7 working days.

- **Bulk PCBs:** For large orders, they offer flexible delivery options. Single Sided and MC PCBs can be delivered on demand or within 10 to 12 working days. Double-sided and Multilayer PCBs are available with a delivery window of up to 21 days.

Exclusive Tatkal Sewa: PCBs in Just 12 Hours

For clients with urgent needs, Supreme Circuits' Tatkal Sewa guarantees PCB delivery within just 12 hours. This service is designed for businesses that require rapid prototyping and fast market launches, giving them a critical edge in today's fast-paced tech industry. Supreme Circuits' Tatkal Sewa exemplifies their commitment to customer service and flexibility.

Advanced Technology and Strict Quality Standards

Supreme Circuits prides itself on adhering to strict quality control measures. Their dedication to ISO 9001:2015 standards and continuous application of international advancements in PCB technology ensures that each product meets high performance and reliability criteria. They take pride in providing products that not only meet but exceed the expectations of their customers.

The company's motto—"to provide quality, efficiency, and competitive price"—reflects a commitment to going the extra mile. Supreme Circuits understands that in the PCB manufacturing industry, quality cannot be compromised. They prioritize customer satisfaction by setting quality as the core of their products and services.

Seamless Quotation Process

To make the ordering process as convenient as possible, Supreme Circuits provides an automated online quotation tool on their website, www.supremecircuits.in. This tool allows clients to get real-time estimates, making it easier to plan projects and budget accurately.

Trusted by Clients Across Industries

Located in New Delhi, Supreme Circuits has established a loyal client base across India, known for its commitment to quality and customer-first approach. The company's certifications for RoHS compliance, IAF accreditation, and Reach registration underline its dedication to environmental responsibility and product safety.

·

In an industry where time, precision, and quality are of utmost importance, Supreme Circuits stands out as a trusted partner, delivering excellence in every board. Whether you need a quick prototype or a large-scale bulk order, Supreme Circuits is ready to meet your needs with speed, reliability, and a commitment to superior quality.

ELECTRONIC CITY - September 2026

Shri Ganeshan J. Ezbon
M. D. of EZBON GLOBAL SOURCING

EZBON GLOBAL SOURCING: Empowering Innovation Through Quality Electronic Components. In the ever-evolving world of electronics, where precision, quality, and timely availability determine success, **EZBON GLOBAL SOURCING** stands out as a trusted and dynamic leader in the sourcing and distribution of electronic components. Founded by **Ganeshan**, the company has grown into one of India's most reputable importers and exporters of components and connectors, catering to both domestic and international markets.

A Vision-Driven Company

With its roots firmly planted in India, **EZBON** has quickly emerged as a leading **Professional Distribution Company** in the field of **Electronic Components**.

Under the leadership of Ganeshan and a team of skilled professionals, EZBON combines **business acumen** with **technical expertise**, ensuring clients receive not only the right components but also value-added support and service. What sets **EZBON** apart is its structured operation model, tailored to meet the demands of both **foreign and local currency businesses**. This dual-operation approach has allowed the company to seamlessly serve a wide range of industries, including manufacturing, R\&D, consumer electronics, and IoT development.

Comprehensive Solutions for Every Vertical

EZBON GLOBAL SOURCING is more than just a distributor — it is a one-stop sourcing and design solution provider.

The company specializes in **Ready Reckoner Solutions**, providing flexible and customized services across various verticals to meet the unique requirements of its clients.

Their vast inventory includes a wide array of **electronic components,** such as:

- **Active Components**
- **Passive Components**
- **IGBTs and MOSFETs**
- **Connectors & Electromechanical Components**
- **Displays & Antenna Products**
- **Wi-Fi & Bluetooth Modules**

From prototyping to mass production, **EZBON** ensures clients receive the components they need with **reliability, speed, and affordability.**

Quality Assurance & Certifications

Committed to quality, EZBON is recognized with **ISO 9001** and **IAF certifications**, reaffirming its dedication to international standards in supply chain management and customer satisfaction. Every component sourced and supplied undergoes strict quality checks, ensuring reliability and performance in every application.

Global Reach with a Local Touch

While firmly established in India, EZBON's operations extend globally, making it a preferred **importer and exporter of electronic components and connectors**.

Their global sourcing network ensures the availability of the latest and most advanced technologies, while their localized service ensures **personalized support** for clients.

BLDC Complete Solution

EZBON committed to providing overall kitting & tech solution with high-quality drive and control chips for various BLDC motor systems, as well as consulting services for motor drive technology with cost effective & better lead time to the customers to play effective role in Indian market. The application fields of solution we provide cover industrial equipment, motion control, electric tools, consumer electronics, intelligent robots, IT and communication and other drive control fields widely used including smart home appliances.

Automotive Electric Vehicle Complete Kitting solution

EZBON main focus on Automotive sector having strong engineering team with experience in Electronic product design. We are capable of undertaking new product development as well as redesign or modernizing obsolete products in Car head lamp adjuster, Car air conditioner systems, Car HMI monitoring and Control units, EV Charging units, Vehicle horn products, EV BLDC motor controllers etc., with a strong system of auto-grade certified associate companies and partners to carry out every aspect of engineering. We do support from proto to complete product assemble with overall solution in BOM kitting with competitive cost and better lead time than the existing one.

Conclusion

As electronics continue to shape the future of innovation, EZBON GLOBAL SOURCING, under the visionary leadership of Ganeshan, remains committed to empowering industries with the highest quality components and tailored solutions. With a perfect blend of global reach, technical know-how, and customer-centric values, EZBON is not just a supplier — it's a **strategic partner** in progress.

TREFLIK
SOLAR IS TREFLIK

Solar street light is an augmented source of light that is typically fed into or incorporated into the poles by solar panels on the lighting structure. The solar panels charge a battery that powers LED light throughout the night.

Street lights play a key role in maintaining a smooth flow of traffic and inhabitants' safety. At Treflik, we are proud that we are one of the top LED Solar Street Light manufacturers and provide a wide selection of urban LEDs. Direct Solar LED

illumination is a cost-effective, energy-efficient, and long-lasting solution for future cities utilizing zero cabling and no grid connectivity needed. Just plug & play Treflik Solar Lights Anywhere, Anytime.

GOLDWYN LED
Smart Lighting

Goldwyn Limited is an ISO 9001: 2008 quality certified company engaged in the design and manufacturing of LED lights. Goldwyn offers a wide range of modern, aesthetically designed and energy efficient LED lights for external and internal applications.

Our LED lights have high reliability built into the design through years of research and development.

Goldwyn ensures high quality by controlling the design and manufacture of critical components such as electronic drivers and optical lens at our plant. Goldwyn lights undergo rigorous testing for extreme temperature and humidity conditions to ensure reliability in all operating conditions.

Our design philosophy is to ensure that Goldwyn's lights withstand extreme power supply conditions of over voltage and surges.

Goldwyn has a state-of-the-art photometric laboratory which enables us to monitor all critical parameters of the light. Goldwyn is able to deliver lighting files for every type of LED light that we design and manufacture. The lighting files help the customers and architects to plan the placement of lights for the best results.

Made in India for the world

Pioneers in Panic Switches, Electronic Sirens & Security Solutions Since 1996

For nearly three decades, **IOTA International** has stood as a trusted name in the security systems and automotive electronics industry. Founded in 1996 by the visionary engineer **Mr. Mahesh Mahawer**, the company began its journey with a single mission – to become a pioneer in providing reliable, high-quality, and innovative safety solutions for industries worldwide.

Today, IOTA is recognized as a symbol of quality and trust, catering to a vast clientele of OEMs and ODMs across the globe. From emergency panic switches and SOS buttons to advanced electronic sirens, LED lighting systems, SMPS units, and IP67 enclosures, IOTA delivers products that meet the toughest industrial and automotive demands.

Unmatched Quality and In-House Excellence

At IOTA, quality is the essence. The company believes, "Chase quality, and quantity will chase you", a philosophy that reflects in every product that leaves their facility. With a complete in-house manufacturing setup—including a fully equipped tool room, injection molding, sheet metal fabrication, CNC machining, Juki SMT pick & place technology, ultrasonic plastic welding, and R&D facilities—every product is crafted with precision and reliability in mind.This state-of-the-art infrastructure ensures full control over design, development, and production, enabling IOTA to meet ARAI norms compliance and IP66, IP67, IP68, IK08, IK10 standards, with operating temperatures ranging from -20°C to +85°C.

Innovation Meets Reliability

IOTA specializes in electronic sirens, panic switches, and SOS buttons—each designed with the latest technology, optimized for static, dynamic, and mechanical performance. With a strong team of qualified engineers, the company constantly innovates to meet evolving industry needs, offering customized solutions for specific OEM & ODM requirements.

Electronic Sirens
Outdoor Applications

Piezo Sirens
Panels & Indoor Applications

Emergency Panic-Switch 'NC'
Compatible with AIS140 VTS

Siren with Strobe Light
Audio Visual Indication

Panic Alarm
School & Factory Emergency Application

Motorized Siren
Electricale Siren Range upto 3km

Flasher Light
Visual Indication

Beacon Light
VIP Lights

Water Overflow Alarm
Save Water Save Electricity

Global Reach – Made in India for the World

Proudly "Made in India for the World", IOTA has built strong partnerships with major industries, thanks to its unwavering technical support, prompt service, and top-notch products. Every item is rigorously tested to ensure it exceeds customer expectations in performance, flexibility, and durability.

Commitment to Customers

The IOTA team takes responsibility for quality at every step, ensuring that any challenge during production is resolved without compromising product efficiency. Their mission is simple—to keep customers satisfied with the best technology, unmatched service, and dependable quality.

From emergency response products to industrial safety solutions, IOTA International continues to set benchmarks in the security and automotive electronics sectors—proving that with dedication, innovation, and quality, excellence is not just a goal but a habit.

Blue Star Enterprises

QUALITY • INNOVATION • PERFORMANCE

WHITE POLYCARBONATE (PC)
REFLECTOR

A White Polycarbonate (PC) Reflector is a highly efficient optical component engineered for LED floodlights and streetlights. Molded from optical-grade white polycarbonate, it acts as a high-diffuse reflector that bounces and redirects stray light emitted by the LED chips forward into the target beam angle, maximizing total lumen output and light uniformity.

APPLICATION:-

1. Flood Light
2. Street Light
3. Solar Light
4. Driver box
5. Cylindrical lights
6. Highbay Lights
7. Any Customisation possible

KEY TECHNICAL FEATURES

High Reflectivity (Up to 95–98%):
The specially formulated opaque white compound provides high diffuse reflection (Lambertian reflection), preventing light absorption inside the luminaire housing and minimizing hot spots.

Thermal & Heat Resistance:
Engineered to withstand high continuous junction temperatures generated by high-power LED boards (typically rated up to 120°C–135°C continuous use without warping or yellowing).

Impact Resistance & Durability:
Polycarbonate provides exceptional impact strength—virtually unbreakable compared to traditional aluminum, glass, or PMMA reflectors—making it ideal for rugged outdoor fixture designs.

World Class Advanced Environmental Test Chambers, Vibration Shakers, Polymer Testing Products

25 Years of Excellence 2000 - 2025

We are World Class Supplier of Environmental Chambers, Vibration Shakers and Polymer Testing Machines catering to
Automobile | Electronics | LED Lighting | Solar | Defence | Aeronautical Industries | R & D Institutes and Test Labs | Educational

ESPEC

ESPEC : Provides climatic test chambers such as temperature chambers(ovens),Temperature and humidity chambers, thermal shock chambers.

- Environmental Test Chambers of Temperature Range : -85° C + 180° C
- Humidity Range : 5 - 98% rh
- Thermal Shock Chambers
- Bench Top Chambers
- Faster Temperature & Humidity Chambers
- Solar Panel Test Chambers
- Walk-in type Temperature and Humidity Chambers
- Environmental Stress Chambers
- Ovens
- HAST Chambers
- Temperature Cycling Chambers

IMV Corporation

IMV Corporation : Manufactures single axis and multi-axis vibration shakers, and related handheld instruments.

- Earth quake Monitoring Systems
- Electro Dynamic Shakers
- Sound Level Meters
- Vibration Measuring Instruments

TOYOSEIKI

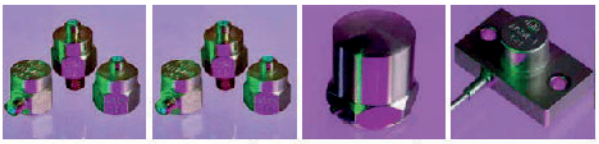

TOYOSEIKI : Polymer test Instruments such as automatic densimeter, Melt Flow Indexers, Tensile testing machines, Rheometers.

- UVC Ozone Aging Tester
- Geer Type Oven
- Abrasion Testers
- Melt Indexer Testers
- Tensile Testers
- Hardness Testers
- Impact Testers and Various Testing Machines to cater the needs for Plastic, Rubber, Electric Wire, Paint , Textile, Paper and Pulp Industries.

DJB — Accelerometers & Cables

DJB Instruments (UK) Ltd has been manufacturing accelerometers, cables, instrumentation, and accessories for over 40 years. With numerous unique products already available, including water-cooled technology for vibration measurements at 900°C, DJB has a great foundation and history to support the next evolution in its global expansion.

Piezo Electric Accelerometers | Instrumentation | Cables & Accessories

IWASAKI — Accelerated Weather Tester Meters

Iwasaki Electric (EYE) a worldwide supplier of lighting products and industrial systems, renowned for its highly reliable and technologically advanced products. Iwasaki corporate philosophy is "Employing light technology to create a comfortable society and sustainable environment"

FEATURES

- Pre-set Various Test Standards\
- Natural Sunlight Correlation
- Stable Testing without influence from Ambient Air
- Outstanding Reproducibility
- Capable with ASTM D 7869 (XER-W83A)
- Easy Operation and Monitoring

SHINYEI KAISHA — SHINYEI TESTING EQUIPMENT

- Acceleration and Impact Recorder
- Shock and Vibration Recorder
- Drop Testers
- Mechanical Shock Testers
- Bump Testers

Testing & Calibration Laboratories

NABL Accredited Lab as per ISO / IEC 17025

Testing Standards Covered in the NABL Scope:
ASTM, AIS, BS, CIE, EN, JSS, IS, ISO, IEC, MIL, QM etc.

PRESSURE POLYMER TESTS (Non - NABL Scope):
Tackiness Testing for Polymer Products

TESTING SERVICES

ENVIRONMENTAL TESTS | DURABILITY TESTS

CALIBRATION SERVICES

VIBRATION CALIBRATION | SHOCK CALIBRATION | THERMAL CALIBRATION

SERVICES • Installation and Commissioning by Factory Trained Engineers • Rental Services

ONE ORIGIN INDIA
Distributing Quality

One Origin India Private Limited is the biggest name in the market established in the year 2018 and we are leading manufacturers of Lithium Ion Cells, Prismatic Battery and LifePo4 Battery. All these products are acquired from best vendors in the market. Our company ensures that these products are timely delivered to our clients.

These items are widely asked for by customers due to its durability, cost-effectiveness and unmatched quality. In addition, we supply products in best quality at a very affordable rate.

3.7V, 7.4V & many more..

High-quality products

- Experienced Team
- On-Time Delivery
- Ethical business practices
- Tested Quality products
- Affordable prices
- Wide distribution network

batteries:

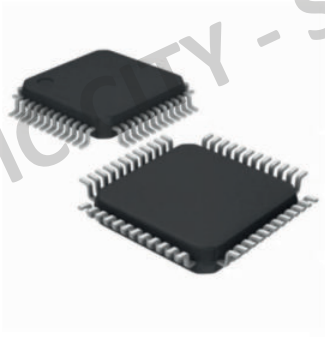

- 14500 Cells
- 32650 Cells
- Lithium Ion Cells
- Prismatic Batteries
- Polymer Battery
- Mobile Battery
- Power Bank
- E-Vehicle Batteries

VOLTIRO ELECTRONICS

Voltiro Electronics Pvt. Ltd.", are the biggest name in the market established in the year 2017, we are leading Wholesale Trader of Kids Tracking Device, **GPS Tracking Device, Electrolytic Capacitor, Ferrite Inductors,** etc. We strive to achieve high customer satisfaction while acknowledging their varied needs in the most effective manner. Our organization is successful in retaining the belief and trust of the clients due to our association with reliable vendors of the industry. These items are widely asked for by customers due to its durability, cost-effectiveness and unmatched quality. In addition, we supply products in best packaging at a very affordable rate.

Under the supervision of our mentor Mr. Aabshar Ahmad the Proprietor of the firm, we have successfully achieved all our targeted goals within the specified time frame. His dedication helps us to keep our customers contended.

SOLDER WIRE

Leading Manufacturer of dl platinum 50 gms 18 swg (1.2 mm) tin lead rosin cored solder wire, dl platinum 100 gms 24 swg (0.55 mm) tin lead rosin cored solder wire, dl lead free sn99.3/cu0.7 500 gms 24 swg (0.55 mm) rosin cored solder wire, dl lead free sac0307 (sn99/ag0.3/cu0.7) 500 gms 24 swg (0.55 mm) rosin cored solder wire, dl lead free sac0307 (sn99/ag0.3/cu0.7) 500 gms 12 swg (2.6 mm) rosin cored solder wire and dl platinum 100 gms 20 swg (0.91 mm) tin lead rosin cored solder wire from Chennai.

Location All over southern states and Maharashtra is preferred.
DL Platinum 63/37 solder wire is made only from virgin materials.
Its fastest wetting characteristics make it unique and it has melting temperature of 183 deg Celsius also known as eutectic alloy.
Fastest wetting with lowest spattering characteristics makes it best product available in the market.
Clear residue and low spatter ensures best finishing to the board and makes it user friendly.
It is suitable for all common soldering needs.

Lead Free Solder Paste (RoHS)

Our solder paste is manufactured under a strict process and a controlled enviornment. Our leaded solder paste processes a creamy, smoot texture.

It is a halogen and halide free. Our paste product is a rosin-based chemistry. Residues are clear and maintain a virtually indefinite pin probability life. With its extensive time and long shelf life it is suitable for all lighting and electronics industries. We provide different type of particles size and flux solder paste as per the applications.

Service Tree is a leading manufacturer and exporter of high-quality industrial consumable items like Lead-Free (ROHS) and Leaded Solder Wire, Solder Stick, Flux, and IPA.

YUNFANG METALS - Lead Free Solder Wire

Leading Manufacturer of solder wire sn99ag0.3cu0.7 tin wire lead free tin solder with rosin core, yunfang metals aluminium sn42bi58 solder wire, solder wire sn99.3cu0.7 tin wire lead free tin solder with rosin core, solder wire sn96.5ag3.0cu0.5 tin wire lead free tin solder with rosin core, lead free silver solder wire, for soldering electronics and sn99.3 cu0.7 solder wire.
SN99AG0.3CU0.7 is a low residue cored solder designed for no-clean soldering applications that must meet all appropriate Bellcore specifications. The unique blend of rosin and proprietary activators provide rapid wetting while leaving minimal, optically clear, completely inert residue.
High-performance, fast wetting cored wires that meets the most reliability criteria.
For all hand and automated soldering, component attach and rework operations
Minimal, non-corrosive flux residues for high soldering efficiency.

"KUSAM-MECO" AC / DC TRMS Clamp-On Multimeter with VFD, EF-Detection, PC Interface for Solar Application

MODEL – KM 3001

"KUSAM-MECO" has added yet another High Safety 'UL' listed unique AC/DC TRMS Clamp-on-Multimeter with VFD, EF-Detection, PC interface for solar Application. It is one of its kind of clamp multimeter having so many functions packed in one instrument which even "Phoren Brands" do not have.

It has 1500V DC Volts range specially suitable for Solar applications, Autocheck for Voltage & Ohms Function, VFD-V & VFD-HZ Function, 5ms CREST-Max Capture Mode (Peak Hold) Autoranging, Relative Zero Mode, EF-Detection (NCV), Backlight LCD Display, Auto Power Off. It has a Jaw Opening of 55mm. It has 3-5/6 digits (6000 counts) and 3½ digits (1999 counts) for Hz. It has a fast update rate of 5/second. To preserve the battery it shuts off after 34 minutes of no activity. It has Transient Protection of 12 kV (1.2/50ms surge) not found in any other similar clamp meter in India. The Electrical specifications include AC current upto 2000 Amperes, DC current up to 2000 Amperes, DC+AC current upto 2000 Amps, DC voltage upto 1500V DC, AC volts upto 1000V AC, VFD-ACV,HZ Line level Frequency capacitance, Non-contact EF-Detection, Audible continuity Test, AC+DC Voltage, Resistance, Temperature, Diode Test CREST-MAX (Capture Mode).

The instrument is supplied with manual, batteries, Bkp60 banana plug type K-Thermocouple, test leads, Carrying case. Optionally software can be supplied to download the data to PC.

KUSAM-MECO" 25,000 COUNTS TRMS DIGITAL TRMS MULTIMETER

MODEL - KM 405MK-II

KUSAM-MECO has introduced a new 25,000 count TRMS Digital Multimeter model KM 405MK-II. The instrument has manual range selection. It measures DC Voltage upto 1000.0 V in 6 steps. The resolution is 0.0001 mV. The best accuracy is 0.05% rdg + 3 digits. It measures AC Voltage upto 750 Volts in 6 steps. The resolution is 0.001 mV. The best accuracy is 0.3 % rdg + 3 digits. It can also measure AC+ DC Voltage (AC) upto 750 V in 4 steps. The accuracy is +- 1.0 % rdg + 3 digits. It also measures AC+DC Voltage (AC+DC) UPTO 1000 VOLTS IN 4 Steps. The Accuracy is +- 1.5% rdg+ 3 digits. It can measure DC Current upto 20 Amps in 6 steps.

The resolution is 0.01 micro Ampere. Accuracy is 0.5 % rdg+ 3 digits. AC current measurement is also upto 20 Amps with a resolution of 0.01 Microampere. Accuracy is +- 0.8 % rdg + 3 dgts.

It has function to measure Frequency upto 10.000 Mhz with a resolution 0.01 Hz. Accuracy is 0.1% rdg + 2 digits. The Resistance function has maximum range of 250 M ohm in 7 steps with a least count 0.01 Ohm. The Capacitance range is upto 99.99mF with a least count 0.001nF . It is also equipped with the function of Temperature measurement upto 1000 degree Celcius.(suitable for K-Type Thermocouple.). It also indicates the Duty Cycle from 1% - 99 %. To save battery power it is equipped with AUTO POWER OFF function. It also has NCV Inductive electricity detection function. It has Diode & Continuity measurement function. For safety of the instrument it has Current input misoperation indication.

It also has a Flash light for taking readings in the dark areas. It also has Analog Bar-graph. It can also show MAX-MIN values. It has Data hold function . For clearer readings it is equipped with Backlight . It also has LOW-Battery Indication to warn the user to change the battery at the appropriate time.

It is powers with 3 X 1.5 V AA Battery. After SALES SERVICE IS AVAILABLE.

NYSHA MOBILITY TECH

Set in the Technology hub of India, Bangalore, Nysha Mobility Tech is inspired by the spirit of its organization and is strengthened by the philosophy of product excellence, customer satisfaction and technological advancement.Nysha manufactures various types of wires, cables, components, & interconnects for Automotive (Including EV's), Telecom, Renewable Energy, BESS, Defence, Industrial among other industries.

Siddharth Jain, founder of Nysha Mobility Tech, has over 25 years of entrepreneurial expertise in specialty cables & interconnect manufacturing. He believes that " Across Automotive, Telecom, Renewable Energy, BESS, Defence, and Industrial sectors, technologies like EVs, 5G, and energy storage continue to evolve at a rapid pace. Yet supply chains have not kept up with how quickly OEMs and startups are adapting, underscoring the need for more responsive and future-focused manufacturing. At Nysha, we are developing products addressing this market by leveraging our agile supply chain & engineering capabilities. OEMs, EPCs & startups increasingly are relying on us to be the one-stop shop for launching their new products in very short intervals without the worry of inventory, making us their partner from design to delivery."

BLDC Motor controller

Technosphere Engineering Pvt Ltd | Tekrafti

•Plays an important role in controlling and optimizing the performance of BLDC motors to attain the Speed control, Direction Control, Torque Control.

Diversified Applications of BLDC Motor Controller That We Support :

1. Domestic Ceiling Fans, Pedestal Fans, Exhaust Fans
2. Industrial Exhaust Fans
3. Air cooler
4. IDM unit for Air Conditioner
5. Compressor unit for Refrigerator
6. Chimney

We offer the following services :

- Transfer of Technology
- OEM & ODM
- PCBA Services

CERTIFICATIONS

WE ALSO MANUFACTURING

LED DC TUBELIGHT, DC Bulb, DC & Solar Street Light, Integrated Street Light, Semi Integrated Street Light and Flood Light, AC Flood light, Ac Street Light, Solar Home Light Kit, Solar Lantern, Solar Blinker, Solar Insect Trap, Solar Wild Animal and birds repeller.

Empowering Government Infrastructure with Reliable Solar Street Lighting **SunTech Solar Energy Enterprises – Your Trusted Partner for Government Tenders** As India accelerates toward renewable energy adoption and smart infrastructure development, solar street lighting has become a key component of government projects across the country. From Smart Cities to rural electrification missions, dependable lighting solutions are essential for safety, sustainability, and long-term cost efficiency.

SunTech Solar Energy Enterprises is a leading manufacturer of high-performance solar street lights, actively supporting government departments, municipalities, panchayats, EPC contractors, and infrastructure developers through reliable and tender-compliant solutions.

Specialized Solutions for Government Projects **SunTech** understands that government tenders demand: Strict technical compliance Certified components Long operational life Minimal maintenance Competitive pricing On-time bulk supply With strong manufacturing capability and OEM supply experience, **SunTech** delivers customized solar street lighting systems tailored to tender specifications.

Tender-Ready Product Features **MNRE & Standard** Compliant Designs Products are manufactured in alignment with approved technical standards required for public infrastructure projects High-Lumen LED Performance Uniform road illumination ensuring public safety and improved visibility. Long-Life Lithium / Tubular Battery Options Reliable energy storage for consistent performance during low sunlight days. Integrated & Semi-Integrated Models Flexible configurations suitable for highways, village roads, industrial zones, and Smart City corridors. Weather & Impact Resistant Housing Designed to withstand extreme environmental conditions. Suitable for Major Government SchemesSunTech solar street lights are ideal for projects under:Smart City MissionRural Electrification Programs **PMGSY** Road ProjectsGram Panchayat Development Works Municipal Corporation Lighting UpgradesIndustrial Development Authority Projects Highway & Public Utility Installations Strong OEM & EPC SupportAs an experienced OEM supplier, **SunTech** provides: Bulk manufacturing capability Custom branding support Technical documentation for tender submission Datasheets & compliance certificates On-time dispatch across India After-sales technical assistance This makes SunTech a dependable partner for EPC contractors bidding for government projects. Cost-Efficient & Sustainable Infrastructure Solar street lighting eliminates recurring electricity expenses and reduces dependence on grid power. For government bodies, this means: Long-term budget savings Lower maintenance costs Reduced carbon footprint Sustainable public infrastructure SunTech systems are engineered for durability, ensuring maximum ROI for public investments. Committed to Nation-Building With India's growing focus on clean energy and sustainable urban planning, solar street lighting plays a vital role in infrastructure development. **SunTech Solar Energy Enterprises** is proud to contribute to nation-building by delivering reliable and efficient solar lighting solutions for public use. Shine With Solar Power **SunTech Solar Energy Enterprises** Trusted Manufacturer for Government & Infrastructure Projects For tender participation, bulk requirements, and EPC partnerships - connect with us.

PRECISION
PERFORMANCE
PROVEN GLOBALLY

With a global presence in over **130 countries,** NeoDen PNP machines deliver excellent performance, high accuracy, and reliability for R&D prototyping and small to high-batch production.

One-stop SMT assembly solutions to **10,000+ customers** worldwide, supporting industries including automotive, power, security, IoT, and communications.

Comprehensive after-sales support and training ensure you get the most out of your investment.

FLAGSHIP NEODEN N10P SMT PICK-&-PLACE MACHINE

SMALL SCALE - ECONOMICAL

MEDIUM SCALE - ACCURACY

LARGE SCALE - SPEED & ACCURACY

- **HIGH ACCURACY** Up to +/-10µm Placement Accuracy
- **HIGH PERFORMANCE** Up to 24,000 CPH Placement Speed
- **WIDE COMPONENT RANGE** 0201 to 40mm ICs, Fine Pitch QFP, BGA & Odd-Form Parts
- **FLEXIBLE SOLUTIONS** R&D, Prototyping to High-Volume Production
- **RELIABLE & DURABLE** Engineered for Long-term Stable Performance
- **GLOBAL SUPPORT** Comprehensive after-sales Support & Training

EXCLUSIVE CHANNEL PARTNER IN INDIA

ChipMax Group
The Technology Cluster

CHIPMAX DESIGNS PVT LTD

As the exclusive NeoDenTech partner in India, Chipmax Designs delivers top-tier SMT solutions from its Bangalore headquarters and regional offices in New Delhi, Mumbai, and Ahmedabad. We specialize in the supply, customization, installation, and support of NeoDen SMT Pick & Place Machines for EMS, EV OEMs, IoT, automotive, R&D, solar, and power-solution industries.

Our commitment aligns with the Atmanirbhar Bharat and Make in India initiatives.

ELECTRONIC CITY - September 2026

GU IMPEX

AI & DEFENCE ELECTRONIC COMPONENTS

Precision Delivered

Powering Industries Worldwide with
Commercial, Industrial & Defence-Grade Components

Your Trusted Global Supply Chain Partner

Hyderabad, India

Automotive | IOT &Smart Home | Industrial & Automation | Defence | Healthcare | Renewable Energy | Robotics

Key Highlights

- **100% Original** & Fully Traceable Components
- **Authorized** & Verified Global Supply Network
- **Zero-Tolerance** Anti-Counterfeit Assurance
- COC & Detailed Electrical Test Reports Available

SPECIALIZATION:

- Hard-to-Find Components
- MIL-Grade Components
- Obsolete Components

MANUFACTURING SOLUTIONS:

- ✓ End-to-end BOM management with low MOQ capability
- ✓ Volume-based customized harness, modules & antenna solutions
- ✓ Yearly production planning & BOM scheduling
- ✓ Dedicated after-sales and technical support.
